

# CNC Copper Alloys

SUITABLE FOR CNC MACHINING

## MATERIAL NAME

CNC Copper Alloys

## COLOR

Reddish Brown

## PROCESS

CNC

## PRODUCT DESCRIPTION

CNC Copper Alloys is a class of high-performance metal materials, with excellent electrical conductivity, thermal conductivity, corrosion resistance and good mechanical processing properties, with its excellent physical and chemical properties, plays a key role in modern industrial production, is the high precision, durability and reliability requirements of high parts manufacturing ideal choice.

## TYPICAL APPLICATIONS

- Electronics industry (Connectors, terminals, heat sinks)
- Automotive manufacturing (sensor housing, valves)
- Aerospace (Engine components, connectors)
- Medical equipment (precision instruments, implants)

## PRODUCT SAFETY

- Metal dust generated during CNC machining should be controlled through appropriate ventilation and protective measures to avoid inhalation.
- Use safety goggles, gloves and a dust mask during processing to prevent fine metal particles and sharp edges.

## PRODUCT DELIVERY & WAREHOUSING

- **STORAGE**

Store in a dry, ventilated environment, avoiding moisture and exposure to corrosive chemicals. Apply protective coatings to prevent oxidation or corrosion of metal surfaces.

- **USAGE AND HANDLING**

Remove burrs and residual materials from the product. Use protective equipment like gloves when handling. Avoid using the product in extreme environments or high-load scenarios; regularly inspect for mechanical performance.

- **CHEMICAL COMPATIBILITY**

Avoid contact with strong acids, alkalis, or corrosive solvents. Use appropriate cleaning and maintenance solutions.

Assess risks of oxidation, corrosion, or magnetic effects based on specific application environments.

## MATERIALS WE SUPPORT:

| ASTM | DIN           | GB  | Density (g/cm <sup>3</sup> ) | Hardness | Tensile Strength, Yield(Mpa) | Fatigue Strength (Mpa) | Elongation at Break(%) |
|------|---------------|-----|------------------------------|----------|------------------------------|------------------------|------------------------|
| C110 | E-Cu58&2.0090 | T2  | 8.9                          | 35~45 HB | 210                          | 80                     | 40~50                  |
| C101 | 2.0040        | TU1 | 8.9                          | 35 HB    | 210                          | 80                     | 50                     |
